## The **Redwire** App

The Redwire app contains a doorbell tab available for mobile users.

Contact us today at **850.701.4940** to install your Redwire Video Doorbell.

# Video **Doorbell™**

A WATCHFUL EYE FOR PEACE OF MIND

Delivering video and voice capabilities at your front door using the Redwire app — the same app you rely on to manage your security and home automation systems.

## Redwire App Doorbell Support

The Redwire app ensures that you'll be able to check in on your home whenever you'd like. Any time motion is detected or the doorbell is pressed, you'll receive a notification and be able to monitor who's approaching with 1080P precise clarity, 170-degree vertical field of view for complete "head-to-toe" visibility and Pinch-to-Zoom technology for an even closer look.

## Never Miss Activity at your Door

No matter where you are, you can see who's at your door before opening it. Simply check your notifications and talk with visitors using two-way voice communication. This lets you protect yourself and your family from inside while also keeping an eye on delivered packages and other belongings at your front steps while you're away.

## Premium Wi-Fi Signal Strength

The Video Doorbell works on the 2.4 GHz frequency band to ensure better penetration through concrete walls and other obstructions for premium wifi signal strength outside.

# Video Doorbell™

The Video Doorbell allows users to view and speak to visitors from anywhere.

## Onboard Storage for Video Clips

A pre-installed 16GB Micro SD Card allows for more than 2,000 stored video clips. They're ready to view anytime and anywhere using the Redwire app. If your home's wifi connection fails, the Video Doorbell will continue to function, and recorded clips are available once your wifi connection is restored.

## Secure and Easy Wi-Fi Configuration Set-up

When you're ready to begin using the Video Doorbell, Redwire offers professional installation. Once the doorbell is connected to your wifi network, you can easily manage it's wifi connectivity through the Redwire app, even if you change wifi networks.

## Over-the-Air Automatic Firmware Updates

There's no need for service appointments to apply firmware updates; as new features are released, your Video Doorbell will update automatically.

## Multiple Housing Color Options

The Video Doorbell comes with four interchangeable faceplate options that are easy to install. Color options include black, bronze, cream, and white.

## Adjustable Camera Angles

Depending on your entrance layout, optional Wedge accessories let you adjust camera angle and customize the exact areas you'd want to be triggered any time motion is detected or the doorbell is pressed.

Contact us today at [850.701.4940](tel:850.701.4940) to install your Redwire Video Doorbell.
